

A complex network graph visualization. The graph consists of numerous nodes, represented by small circles, and a dense web of edges connecting them. The nodes are colored in various shades, including gray, black, white, and light gray. The edges are thin, dark lines. The overall structure is highly interconnected, with many nodes having multiple connections. The graph is contained within a rectangular frame.

180 Degrees (247 nodes, 705 edges)

Vertical Flip (254 nodes, 731 edges)
